

## Lightweight Music Player

### Objective:

To create a streamlined and user-friendly web music player that prioritizes minimalism, aesthetics, and unique social features.

---

### Description:

Our player is designed to offer a hassle-free and immersive musical experience, distinguished by the ability of users to personalize song layouts and engage in light social interactions.

---

### Features and Functionalities:

#### Search Functionality:

- Search Box: Easily accessible, supports fuzzy search.
- Filtering Options: Search based on song title, artist name, album, or genre.
- Display Results: Presented in a grid view for a seamless experience.

#### Web Player:

- Standard Controls: Play, pause, skip, repeat, and volume control.
- Lyrics Display: Option to display synchronized lyrics.

#### Customizable Song Layouts:

- Default Layout: Every song will have a basic layout with its album cover, a background image, and a chosen color.
- User Personalization: Users can modify this layout by uploading custom images for both cover and background. Additionally, users can pick a background color that complements their chosen images.
- Layout Switching: Users can easily toggle between default and personalized layouts.

#### Social Features:

- Like a Layout: Option to appreciate or 'like' other users' creative layouts.
- Layout Prioritization: Songs with more liked layouts will have those layouts displayed more frequently.
- Feed Section: Highlights trending songs globally, helping users discover new music based on global plays.

#### User Account and Login:

- Profile Creation: Store personal details, playlists, and customized layouts.
  - Playlist Storage: Users can create, edit, and store multiple playlists.
- 

#### Competitive Advantage:

Ad-Free Experience: Unlike many competitors, our player promises an uninterrupted listening experience without any ads.

Unique Social Interaction: Instead of the conventional text comments, our player introduces the concept of sharing visual layouts, adding a fresh and creative angle to song sharing and appreciation.

---

#### Target Audience:

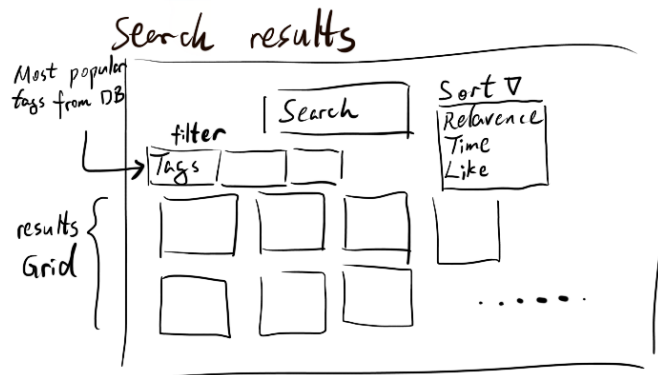

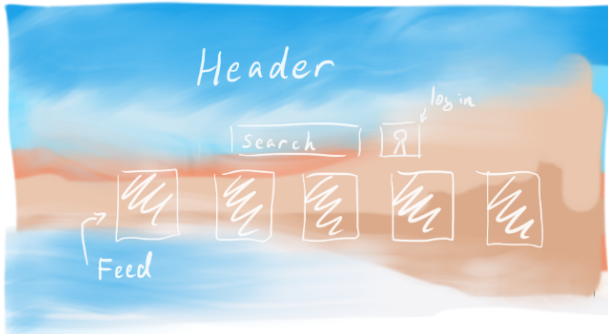

Minimalistic Music Lovers: Those who prefer a clean, ad-free interface without the clutter of unnecessary features.

Creative Users: Individuals who wish to express their creativity and mood by personalizing song layouts.

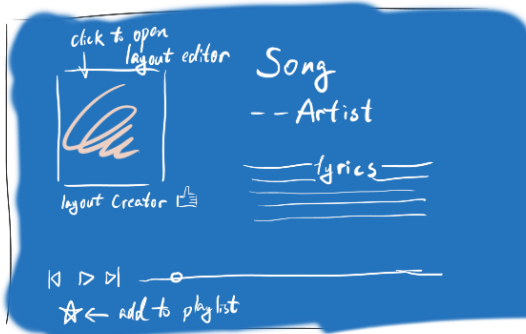

Social Listeners: Those who like to discover new music based on global trends and appreciate the creative layouts of others.
